

Catalyzing connectivity
for communities

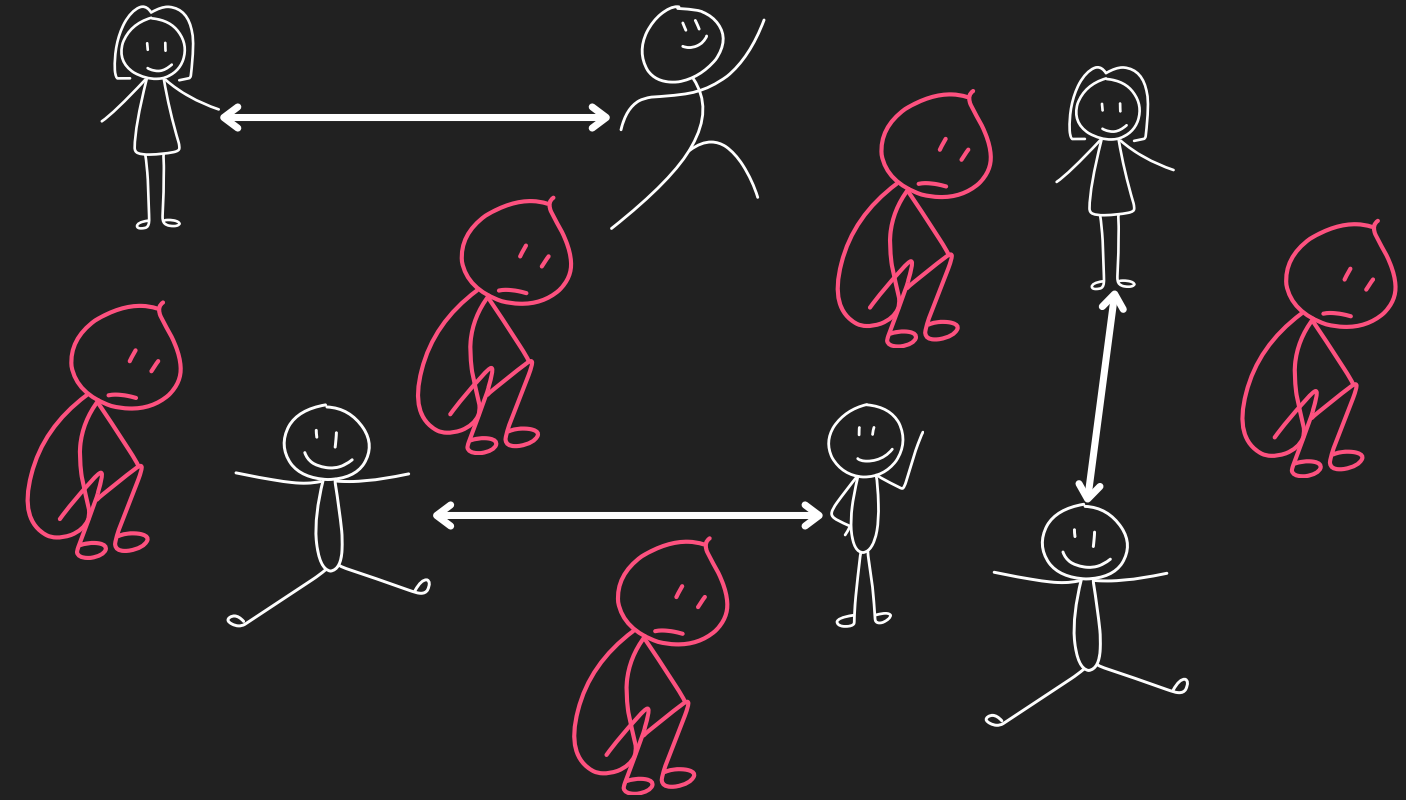

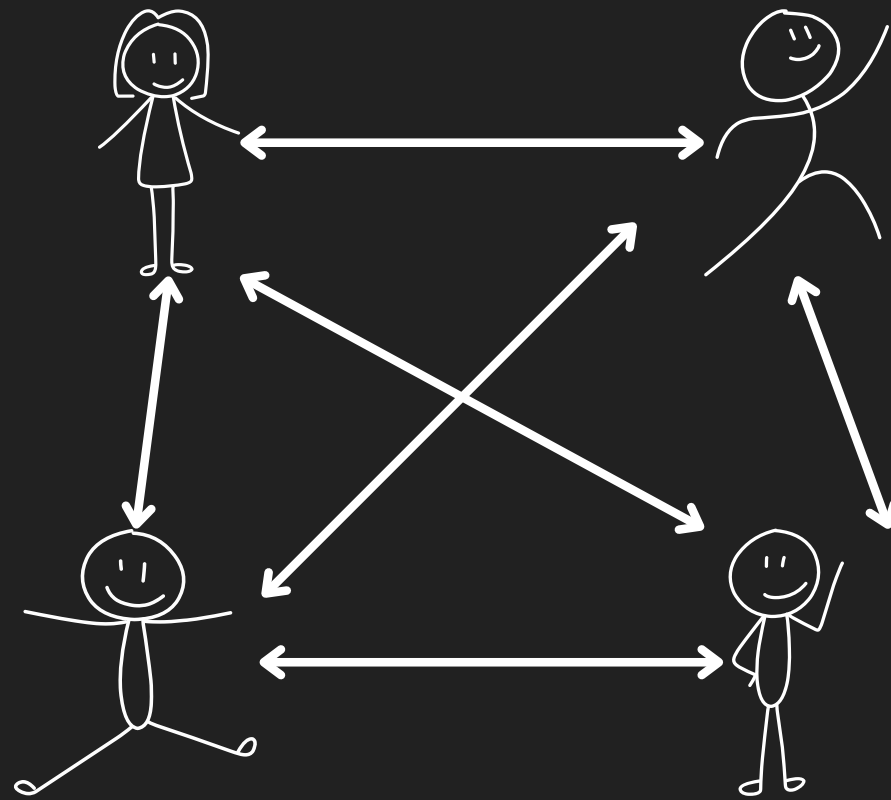

Your superpower is
uniting groups of people

Ours is forging 1:1
connections between them

As your community scales, 1:1 connections diminish

Interpersonal connections are the lifeblood of
community engagement

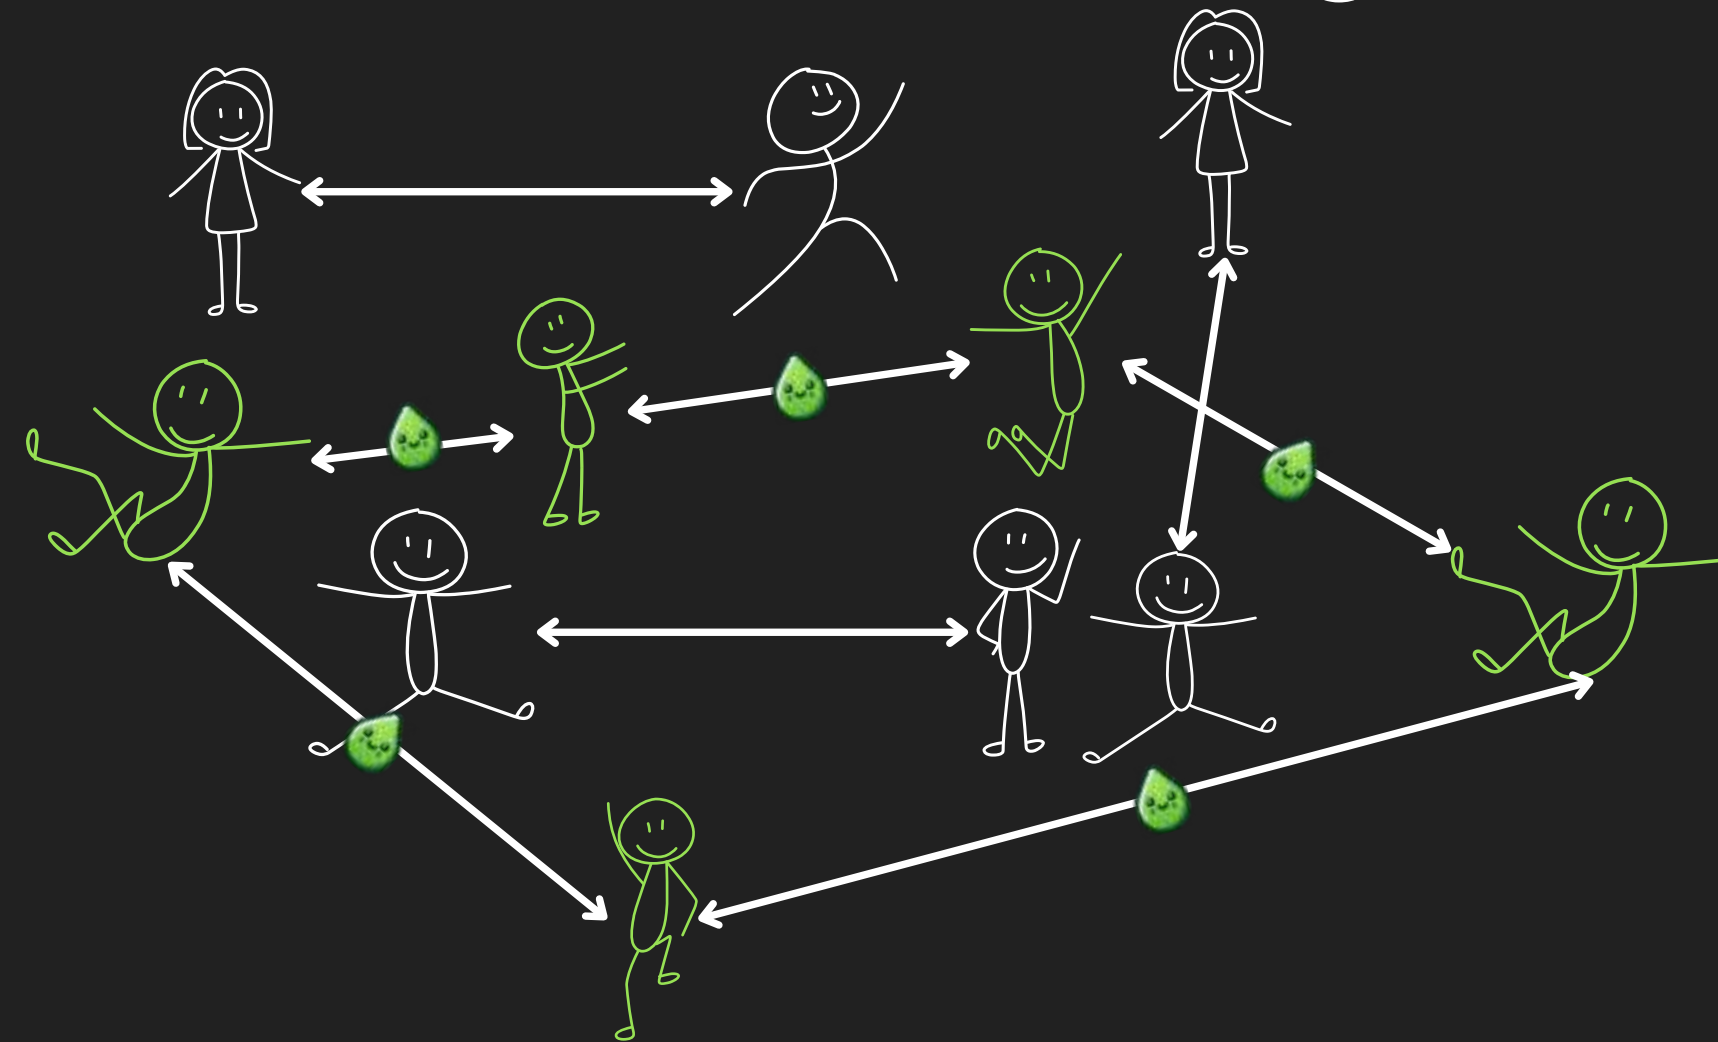

Don't worry...

Boogy will
bridge the gap

By facilitating 1:1 connections for you

So you can focus on what you do best, bringing groups of people together

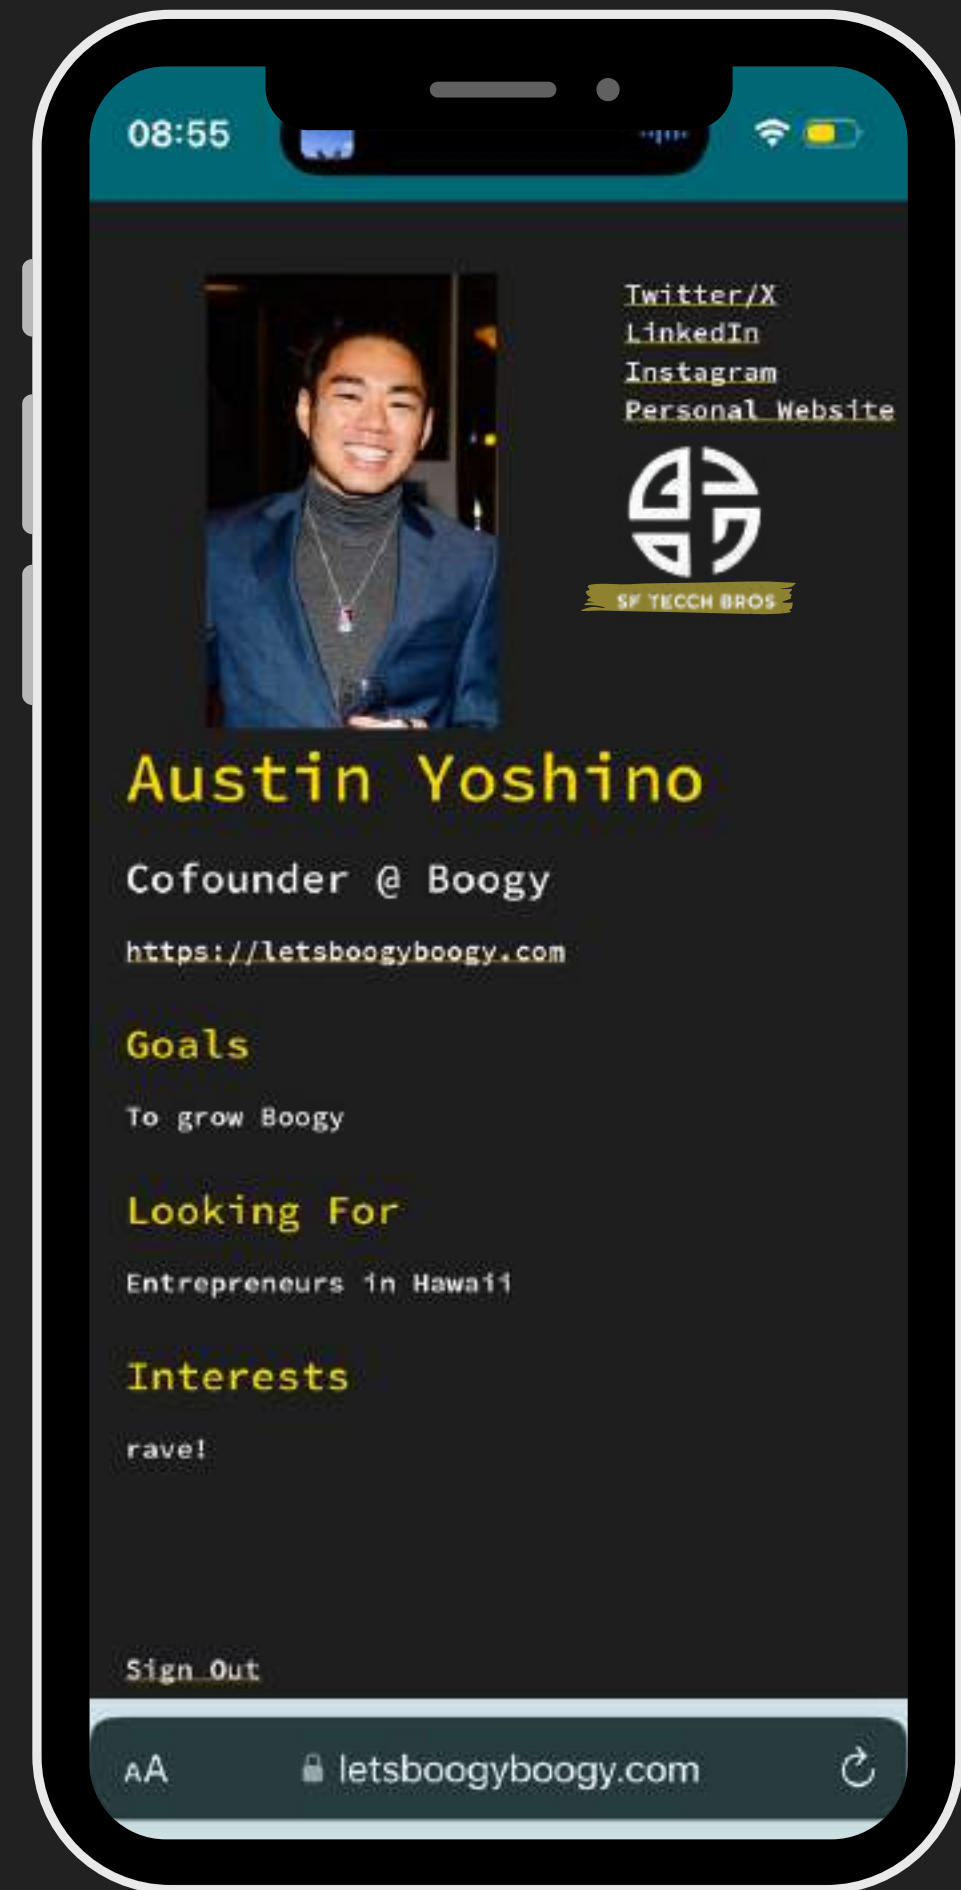

How it works

Step 1) Members create a profile

- Signup directly on web, no app download required
- Community logo displayed on profiles

Seamlessly integrated into your community flow

How it works

Step 2) Boogy finds matches

We work our magic to autonomously curate potential connections

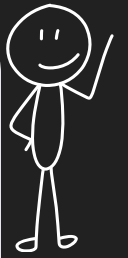

How it works

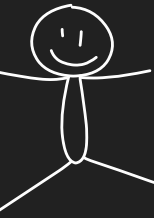

Step 3) Boogy facilitates intros

- When potential connection is found, both people get a text to accept or decline
- If both accept a intro is made through a group chat
- Your community is mentioned for credit ;)
